

Certificate in relation to air transportation by passengers with walking disabilities

We hereby certify that our product

e-motion M25 (incl. DuoDrive)

including the lithium-ion batteries fulfil the requirements of

IATA chapter 2.3.2.4

and are therefore suitable for transportation by passengers according
The pilot in command must be informed about the location of the mobility aid.

The rated energy of the built-in drive unit battery (which is not intended for removal by
the user) is **150 Wh**. The rated energy of the DuoDrive control unit is **11 Wh**.

The e-motion M25 can be set into a dedicated "flight mode". In this mode the system
is completely deactivated. While in this mode the e-motion M25 can only be switched
on by a coded procedure. Unintended switching on by luggage is not possible.
Furthermore, the Bluetooth device of the system is completely switched off.
Since wheels and control unit are portable and contain batteries, we recommend that
you take them with you to the passenger cabin.

**We strongly recommend contacting the airline sufficiently in advance to
request approval for transport.**

This certificate does not apply to damaged or defective batteries.

Due to the frequent amendments of the respective regulations, which partly occur on
an annual basis this certificate is valid until **31st December 2024**.
